**SLEEKFENCE WILL MAKE YOUR FENCE A FEATURE,
AND A STATEMENT THAT LASTS FOR A LIFETIME.**

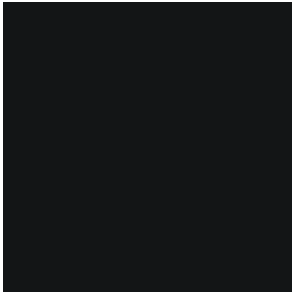

What you will experience when working with SLEEKFENCE Aluminum Fencing Systems:

- Expert support from takeoff to install, with fast, friendly customer service.
- A fully engineered, code-compliant system that's built to perform.
- Premium materials designed to last a lifetime without rust, rot, or warping.
- Preassembled panels and modular parts that make installation fast and easy.
- Fire-rated, wind-rated, and tested for coastal durability.
- Modern designs with multiple heights, finishes, and configurations.

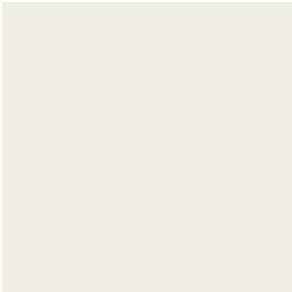

Our website, sleekfence.com is an excellent resource for information and photos on the quality aluminum fencing products we provide.

COLOR OPTIONS

Everything you see in this product guide—including fence panels, posts, mounting channels, and screws—is in stock in two timeless finishes: matte black and warm white.

MATTE BLACK

WARM WHITE

MATTE BLACK delivers a bold, architectural aesthetic that pairs well with modern, industrial, and minimalist designs. Its non-reflective finish absorbs light for a sleek, high-end appearance that enhances privacy while blending effortlessly with various landscapes.

WARM WHITE offers a soft, inviting look that complements contemporary, coastal, and traditional home styles. Its subtle warmth adds brightness to outdoor spaces, creating a fresh, airy feel while maintaining the durability and sophistication of the SLEEFENCE system.

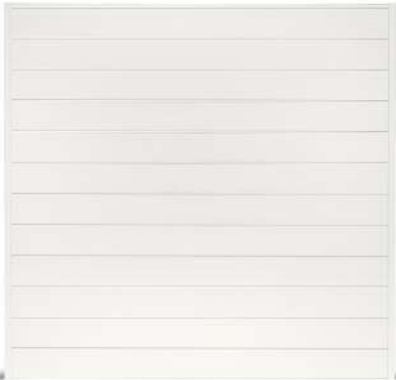

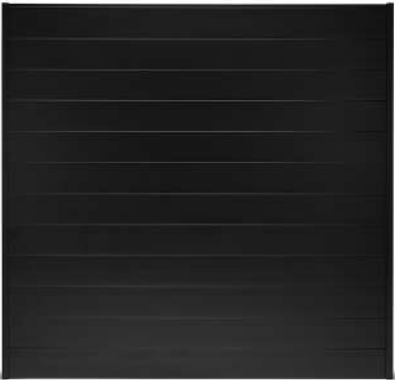

ABOUT OUR PANELS

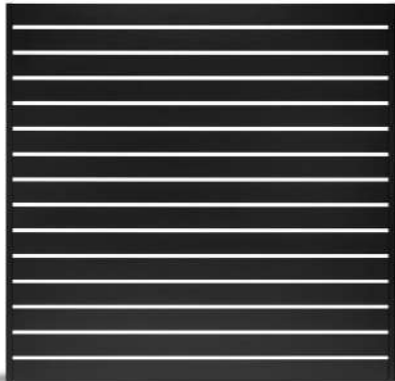

All SLEEFENCE panels are made from structural-grade 6063-T6 aluminum that is extremely resistant to bending, cracking, and denting. The powder-coated aluminum construction cannot rust, rot, or be damaged by moisture, so your fence will continue looking brand new.

Our panels are shipped pre-assembled and are stocked in heights of 4 feet, 6 feet, and 8 feet, but can be customized to any height you need. See our slat packs below.

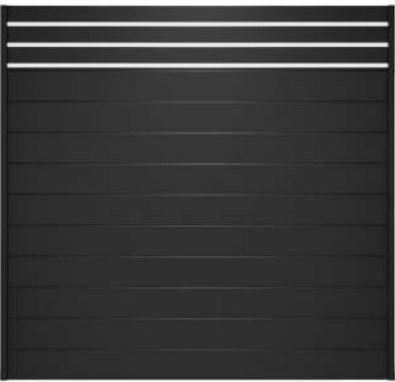

PRIVACY

SCREEN

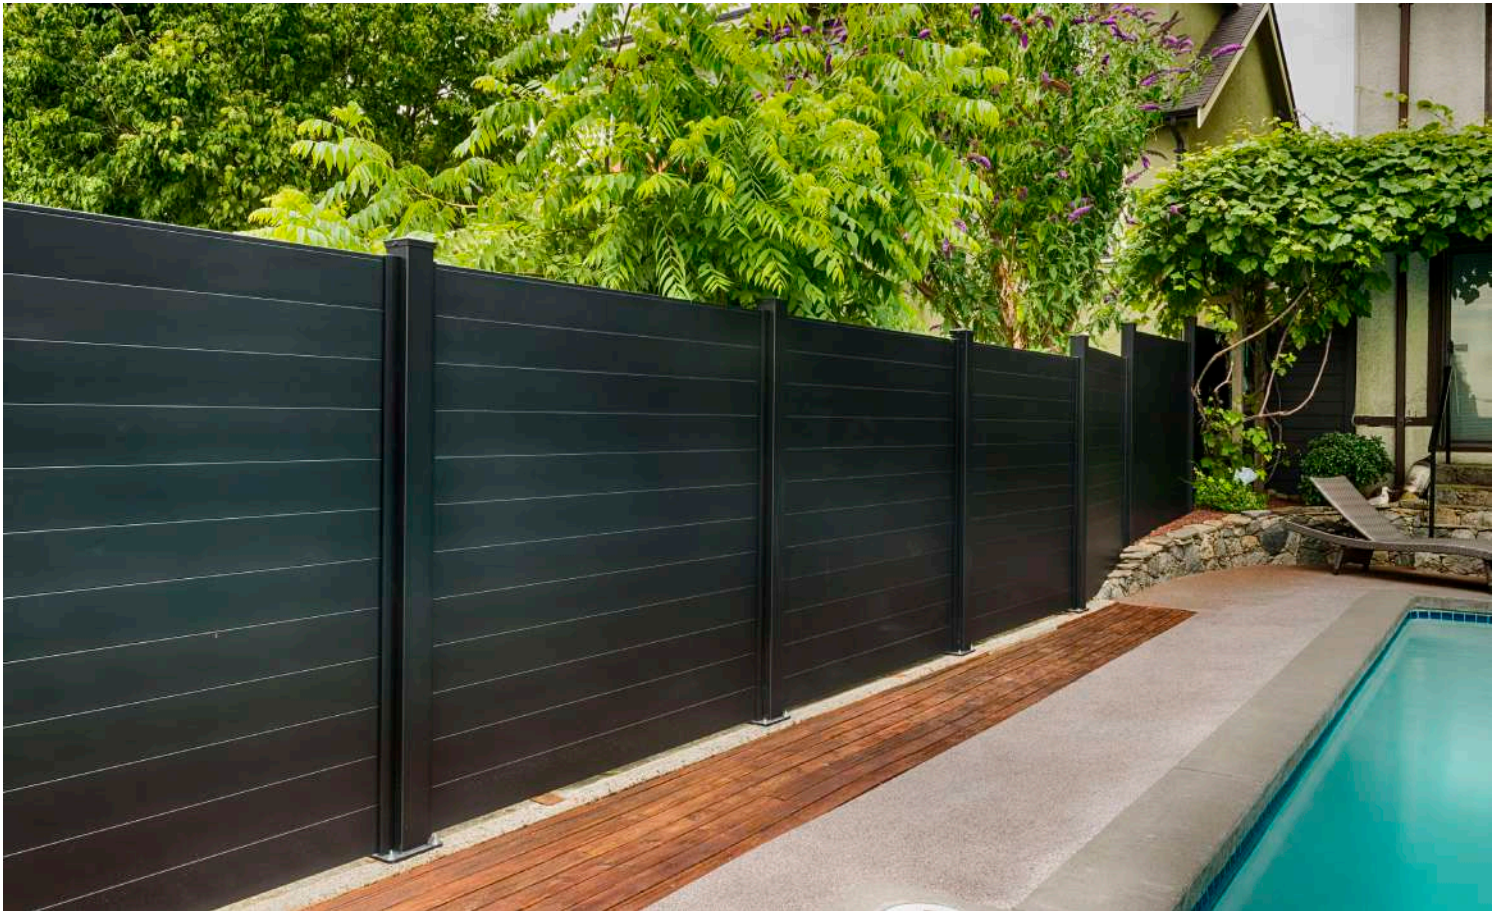

SLAT-TOP

Pre-assembled panels can be stacked as desired to achieve custom heights. Slat packs and components are also available.

SLEEFENCE panels are built to withstand any conditions. Read more about our wind and fire ratings later on.

PRIVACY FENCE PANELS

Looking for a fence that’s as stylish as it is reliable? SLEEKFENCE Privacy Fence Panels give your outdoor space a modern, high-end vibe while keeping prying eyes out. Imagine hosting a summer BBQ or unwinding by the pool, all with the confidence that your backyard is fully private. And here’s the best part: with our durable, low-maintenance design, SLEEKFENCE lets you skip the constant upkeep and spend more time enjoying your space.

PRIVACY FENCE PANELS

AVAILABLE IN BOTH BLACK AND WHITE.

Privacy Fence slats are 6” wide, interlocking tongue and groove.

4 FOOT HIGH FENCING SYSTEM

72” wide x 46” high panel

40” wide x 44.5” high gate

72” wide x 46” high panel

40” wide x 44.5” high gate

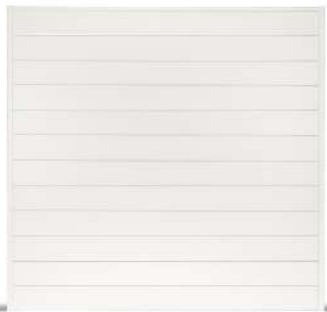

6 FOOT HIGH FENCING SYSTEM

72” wide x 69” high panel

40” wide x 67.5” high gate

72” wide x 69” high panel

40” wide x 67.5” high gate

8 FOOT HIGH FENCING SYSTEM

72” wide x 92” high panel

40” wide x 90.25” high gate

72” wide x 92” high panel

40” wide x 90.25” high gate

6 FOOT WIDE UTILITY GATES

All gates can be installed as a double-swing setup for 7-foot or 12-foot openings.

72” wide x 67.5” high gate

72” wide x 67.5” high gate

SCREEN FENCE PANELS

Looking for a fence that’s effortlessly stylish yet functional? Like tinted windows on a luxury SUV, the SLEEKFENCE Screen Fence gives you bold privacy with a clean design. Crafted from smooth aluminum with elegantly spaced slats, it strikes the perfect balance between openness and secrecy. Whether you’re hosting a summer pool party or creating a serene outdoor retreat, this durable, low-maintenance fence lets you skip the upkeep and focus on enjoying your space.

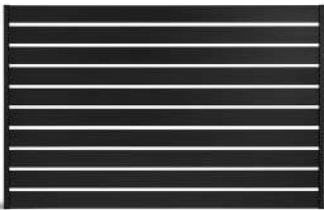

SCREEN FENCE PANELS

AVAILABLE IN BOTH BLACK AND WHITE.

Screen Fence slats are 4” wide with a ¾” gap.

72” wide x 93” high panel

40” wide x 90.75” high gate

6 FOOT WIDE UTILITY GATES

All gates can be installed as a double-swing setup for 7-foot or 12-foot openings.

72” wide x 67.5” high gate

72” wide x 67.5” high gate

SLAT-TOP FENCE PANELS

Crafted from privacy slats and finished on top with carefully spaced 3" slats, the SLEEKFENCE Slat-Top Fence is made for those looking to add a little flair to their fence. It delivers maximum privacy without blocking out your lovely view. Whether you're hosting a weekend cookout or unwinding with a drink after work, this fence keeps things feeling intimate—while still letting the breeze (and compliments) through. Best of all, its tough aluminum build means no warping, rotting, or repainting. Just clean lines, no maintenance, and zero headaches.

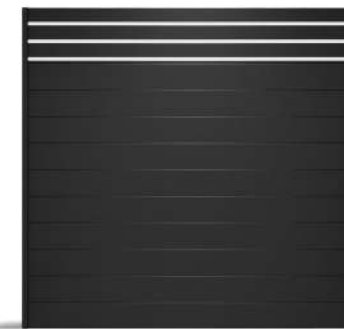

SLAT-TOP FENCE PANELS

AVAILABLE IN BOTH BLACK AND WHITE.

Slat-Top slats are 3" wide with a ¾" gap and are placed on top of Privacy slats.

6 FOOT HIGH FENCING SYSTEM

72" wide x 69" high panel

40" wide x 69" high gate

72" wide x 69" high panel*

40" wide x 69" high gate*

6 FOOT WIDE UTILITY GATES

All gates can be installed as a double-swing setup for 7-foot or 12-foot openings.

72" wide x 69" high gate

72" wide x 69" high gate*

*Slat-Top fencing in white is available by special order only and has a lead time of 20–22 weeks.

36" Stainless Steel Drop Rod

CUSTOM GATES

We design and manufacture all of our custom gates in-house, guaranteeing you a stylish product that elevates your outdoor space. They come in three types: swing, cantilever, and rolling. Our swing and cantilever gates are designed to float elegantly above the ground, while our rolling gates glide smoothly along a ground track. No matter what type of gate you choose, pair it with our SLEEKFENCE panels and make your home the pinnacle of contemporary design!

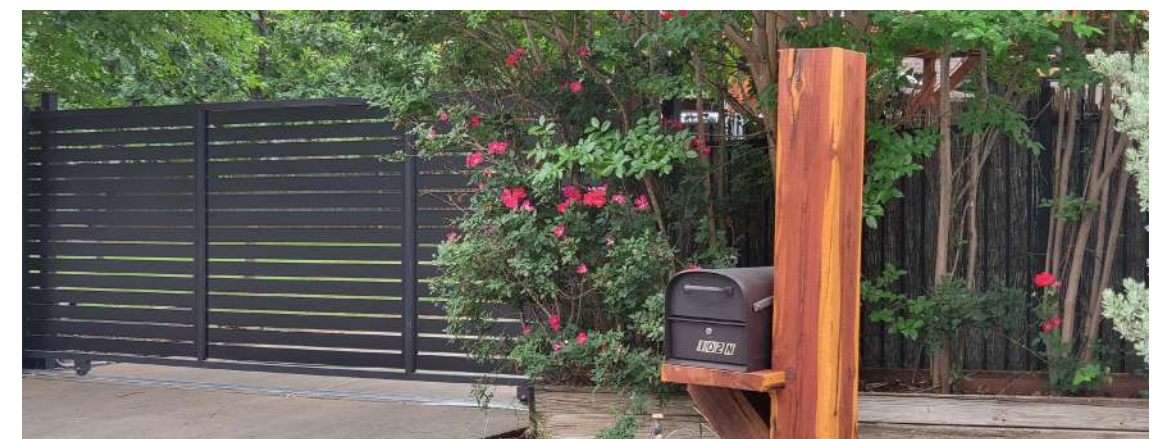

SWING GATE

CANTILEVER GATE

ROLLING GATE

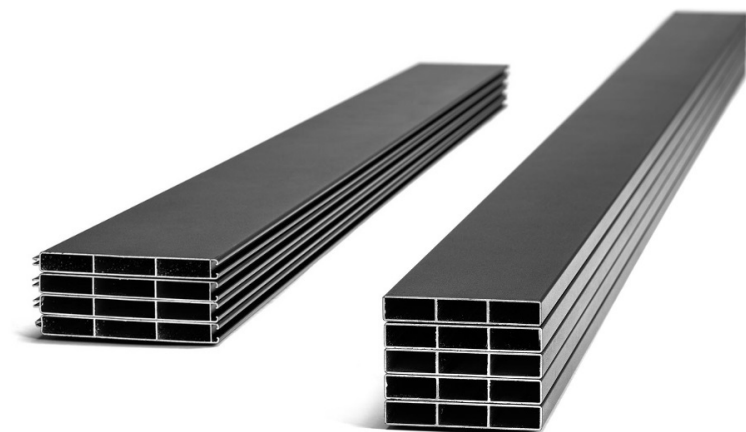

WIND-RATED FENCING

SLEEKFENCE is built for maximum wind resistance, combining high-quality components into one fully engineered system. Each piece is engineered to work together for maximum durability. For example, every slat in every panel is screwed in place at both ends and reinforced with double ribbing for added strength—unlike other fences, where slats are loosely set in place, making them more likely to fail in high winds.

For those living in windy areas, maximizing wind resistance is essential for safety and peace of mind. Our steel post inserts and heavy duty concrete mount bases are designed to significantly improve the wind resistance of your fencing system. By reinforcing the structure, these components increase the overall wind rating of your fence. Investing in these upgrades ensures that your fence can stand up to nature's challenges, providing you with added security and long-lasting durability.

The ribbing in our privacy panels (left) and screen panels (right) greatly contributes to your fence's wind resistance.

FIRE-RATED FENCING

Fencing is an often overlooked but critical part of fireproofing your home. As the connection between your home and its surroundings, a poorly chosen fence can act as kindling, allowing fire to spread from your fence to your home like the wick of a candle. While wood and composite materials can easily ignite and fuel a fire, SLEEKFENCE is made from non-combustible, structural-grade 6063-T6 aluminum. It won't spark, smoke, or burn—giving your home a stronger line of defense.

*Incorporating fire-resistant materials like aluminum fencing can often **reduce insurance premiums**, providing financial benefits while safeguarding your home.*

To back that up, SLEEKFENCE is the only commercial fencing system to earn both ASTM E136 and E84 Class A fire ratings—the gold standard in fire safety. These certifications confirm that it won't contribute to flame spread, even under direct exposure. Our system is also building-code approved in wildfire-prone regions like California, making it a smart choice for homes in high-risk areas. Combined with our non-combustible materials and structural engineering, SLEEKFENCE offers the highest level of fire protection you can get in a fence.

FULLY ENGINEERED SYSTEM

Every part of the SLEEKFENCE system is designed to exceed strict engineering standards, so you know you're getting a fence that's built to last. Unlike other fencing options that require extra parts from different suppliers, SLEEKFENCE is a complete system—designed, manufactured, and sold as one. That means no middlemen and no mixing and matching parts that may not fit perfectly.

Whether you need fencing for a sloped yard, a rooftop, or a deck railing, SLEEKFENCE works for any setup. It's built to meet global building codes and can handle any application, while keeping a modern, high-end look.

WOODGRAIN FENCING

SLEEKFENCE is available in a woodgrain finish in our warm cedar color, combining the natural charm of wood with the durability of aluminum. It's a perfect solution for those who want traditional style with modern performance.

WARM CEDAR

Wood fences have a timeless look, but they're prone to rot, warping, and constant upkeep. That's why we designed SLEEKFENCE woodgrain—to deliver the classic appeal of wood without the drawbacks. Each panel is finished using a sublimation process: a powder-coated base layer is applied first, followed by a baked-on woodgrain texture. The result is a low-maintenance, rot-resistant aluminum fence with the warmth and beauty of real wood.

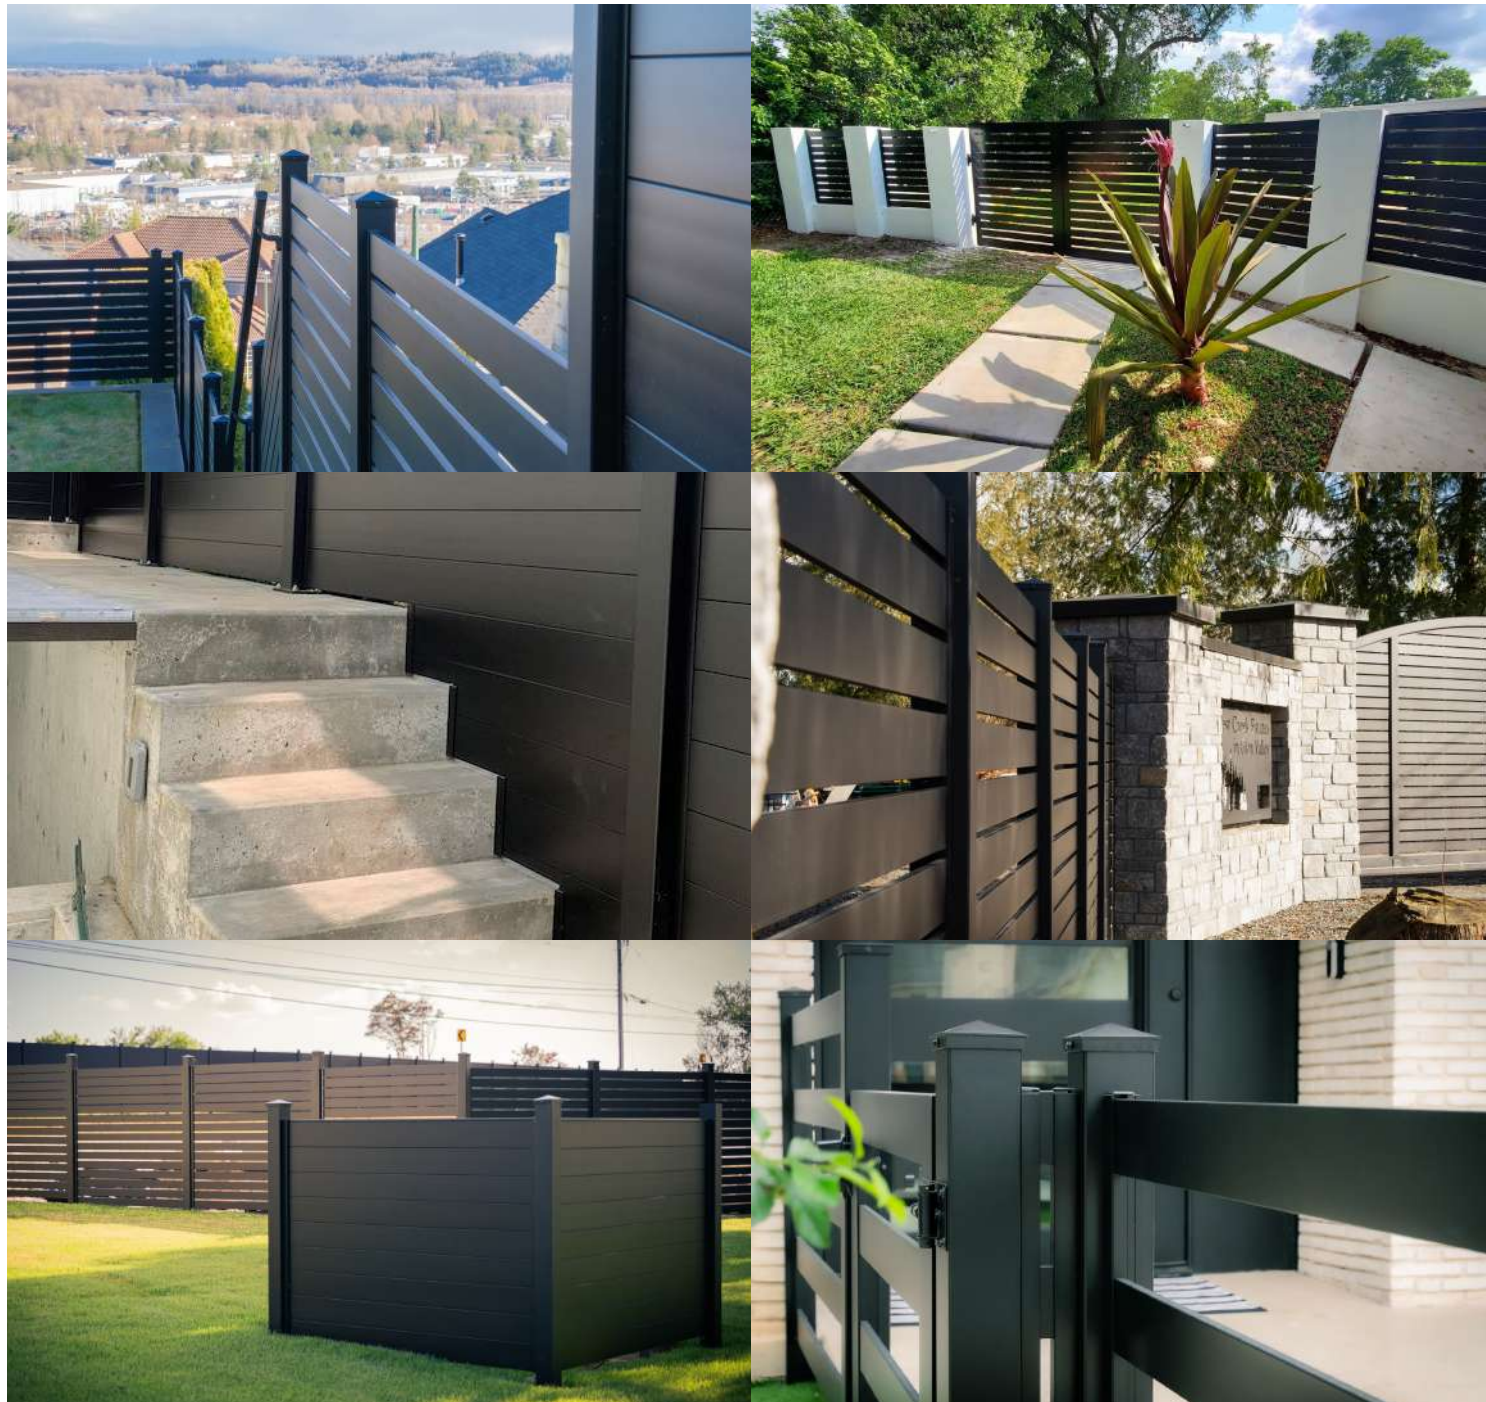

BEFORE & AFTER INSTALLATION

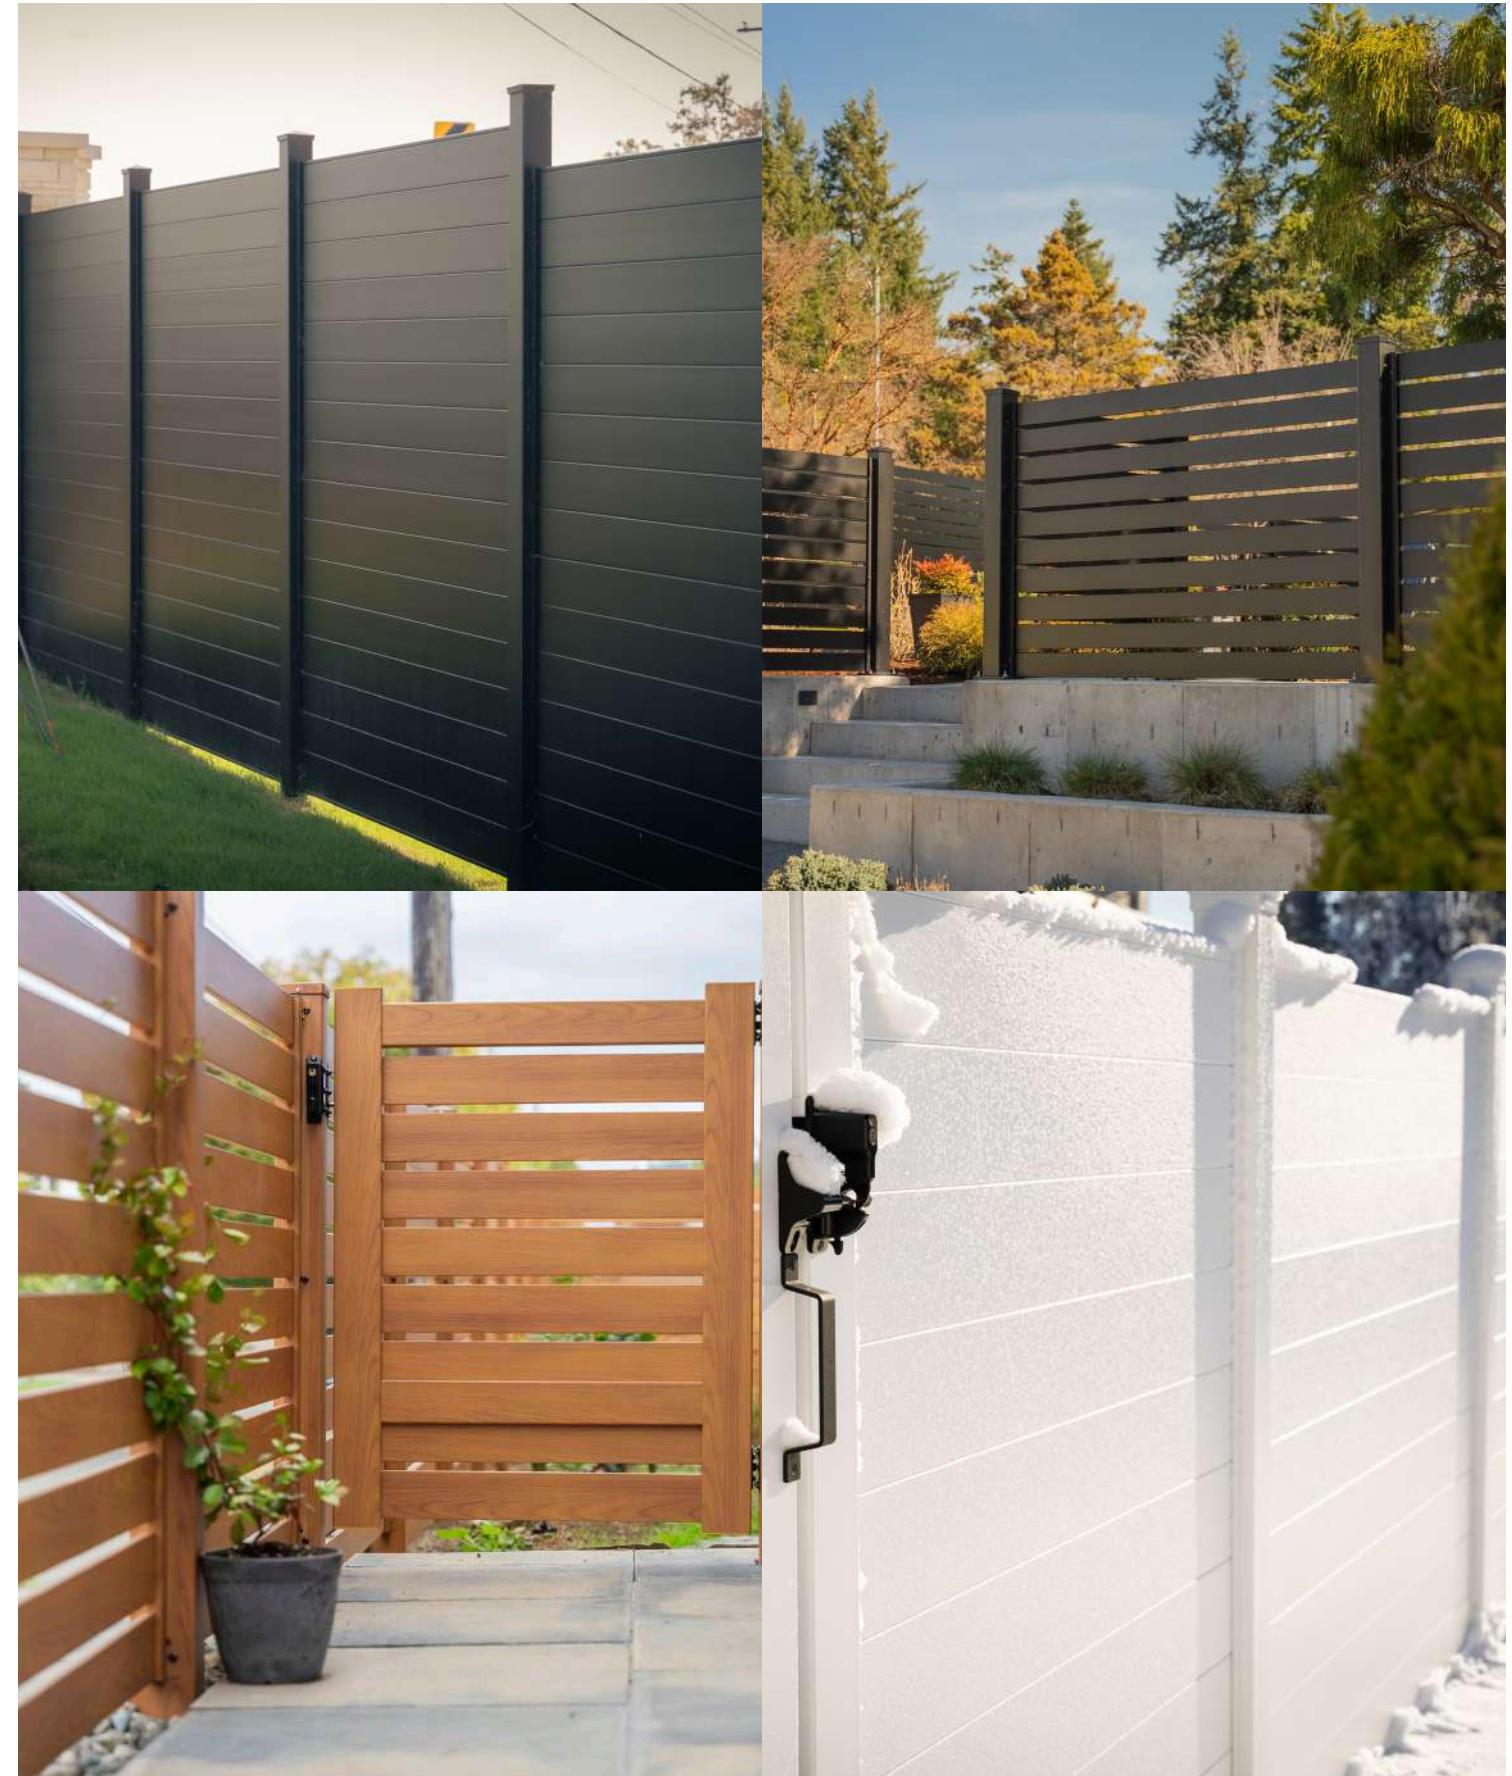

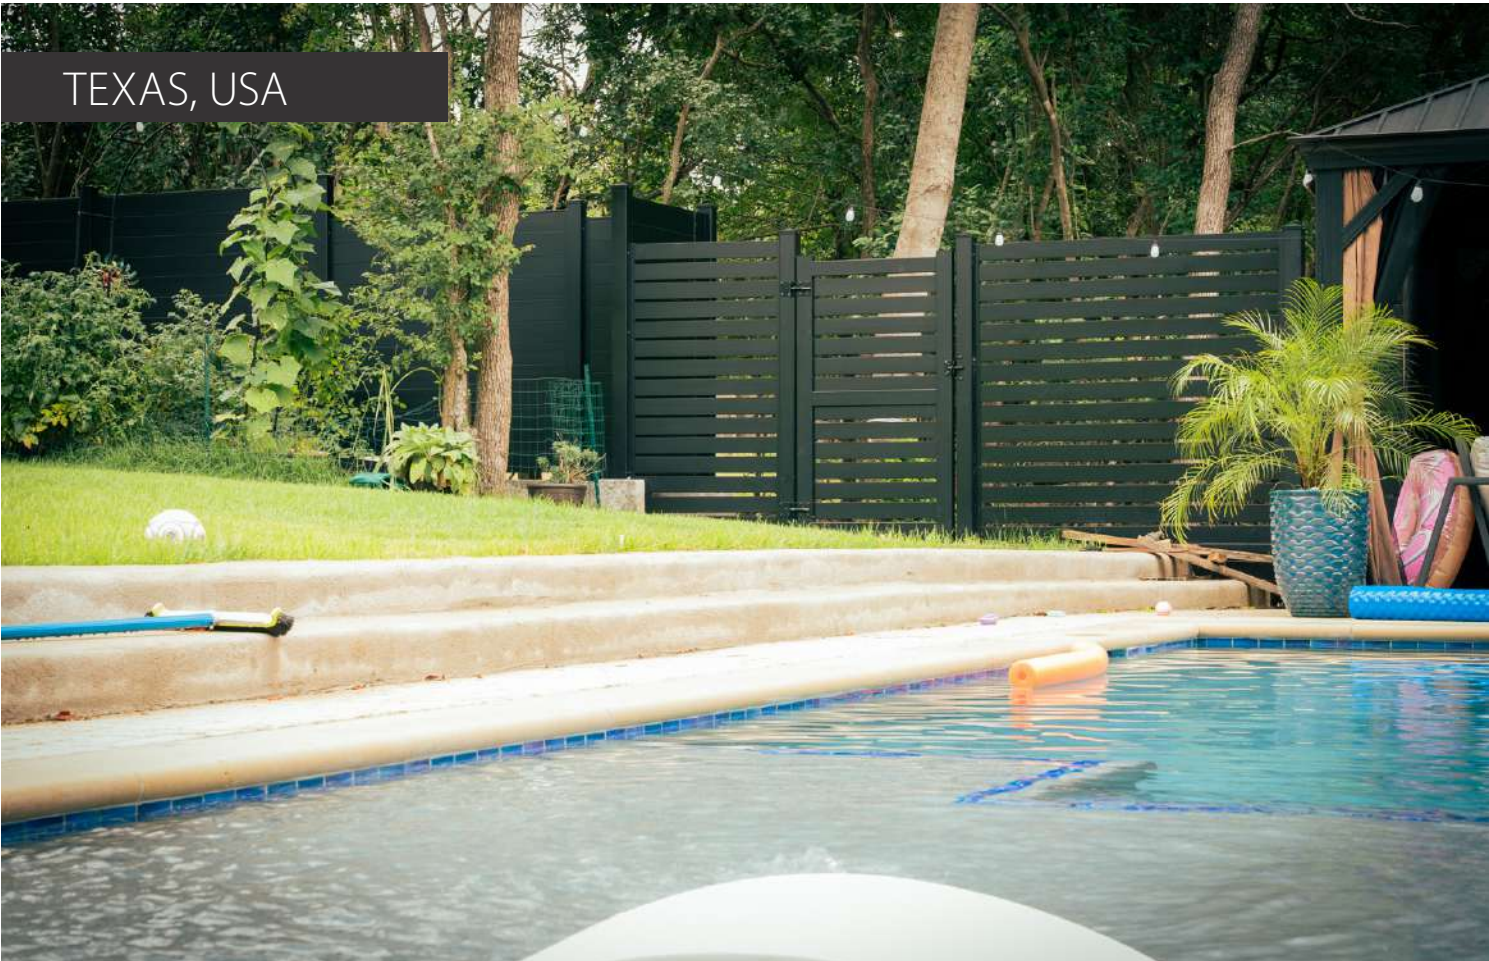

CUSTOM FENCE EXAMPLES

SLEEKFENCE can be customized to fit virtually any project specifications, no matter how complex. Need a fence installed on a steep slope? We've got you covered. Want to mount it to marble blocks or cut it precisely to follow the angle of a staircase? No problem. Our fully engineered system is designed with flexibility in mind, making it easy to adapt to unique layouts and architectural challenges. Every component is precision-crafted for smooth, straightforward installation. When you choose SLEEKFENCE, you're not just getting a fence—you're getting a system that brings your design vision to life.
